 **Tokyo's Special Zone for
Asian Headquarters**

The project aims to make Tokyo the preferred site in Asia for regional headquarters and R&D centres. In addition, support will be given in the form of consultation services. Known as the 'Business Development Centre TOKYO', the service will provide advice in English to enable the smooth development of businesses by foreign companies in the special zone, as well as helping companies' employees and families in their transition to Tokyo. It ensures the development of business and living environments, the provision of information in multiple languages and the supply of high-performance developments.
